Build the Movement

From the Comrades of the RAIL

November 3, 2023

This day in history, 44 years ago (November 3rd, 1979), saw the tragic massacre of members of the Communist Workers Party in Greensboro, North Carolina. Carried out by armed reactionaries of the KKK in collaboration with fascist pigs of the Greensboro city police department, the assassination left 5 Comrades slain (Cesar Cauce; James Waller; William Evan Sampson; Sandra Neely Smith; Michael Nathan). Their names live on as martyrs of the revolutionary movement who perished during the hot bed of struggle against the various imperialist wars in Southeast Asia, and the black liberation movement which swelled to its peak during the 1960s and 70s.

It is on today's historic occasion that we announce the founding of the Revolutionary Anti Imperialist League (RAIL).

A growing imperative now asserts itself for the formation of a new anti-imperialist organization in Canada, as we see the communist movement grow increasingly fractured, to the point of irrelevancy; even as the old movement dies in its sleep. Founded on the principles of Marxism-Leninism-Maoism and taking anti-imperialist resistance within the 1st world as its primary task, this statement authored by comrades from across Canada, declares the formation of the RAIL.

As the focal point of struggle in the contemporary world has now concentrated to the global periphery, the old communist parties of yesterday have gradually outlived their historical role by failing to recognize this all-round trend in the development of imperialism in the world today. This imperative is what leads us to declare the formation of the RAIL – the necessity of waging anti-imperialist resistance in the 1st world.

The principal contradiction in the world today is between the exploiter countries and the exploited countries – between the 1st world and the 3rd world. In the final analysis, an objective investigation of concrete conditions of the world situation and present balance of forces, clearly demonstrates that the United States remains the primary imperialist power in the world today.

In recognition of the lack of revolutionary potential in Canada at this time, RAIL takes anti-imperialist resistance within the 1st world as our central task, and seeks to construct a movement to break out of capitalist false consciousness and challenge the hegemony of 1st world imperial ideology, while simultaneously working to build a long term organizational structure pending inevitable crisis and severe change in objective conditions.

To this end, we are fully committed (in mind of the presently existing material conditions), to the pursuit of struggle through all practical, extant channels. This will involve the building of study groups to facilitate the discussion and apprehension of revolutionary politics; the promotion of solidarity with the victims and resisters of empire; to cooperation with already existing groups on the basis of the Maoist principle of unity-struggle-unity; and to the participation in mass movements wherein we will strive constantly to raise the global class character of all struggles.
